

IPANow! Multiple Licenses

Schools, Colleges, Universities, and Seminaries may expand your authorized use of our product at a discounted rate by purchasing multiple Licenses.

Applicable to: Educational institutions purchasing *IPANow!* directly from PhoneticSoft for installation and use on more than one computer. Examples: Universities, Colleges, Seminaries, High Schools, etc.

How it Works: The institution pays a fee *per license* based on the number of computers on which it will be authorized to use the software (see pricing structure below). PhoneticSoft will provide one copy of the software to the institution. The institution may then install the software *only* on the number of computers for which a license has been purchased.

Rules: Use of the software is restricted to the licensed computers. The License covers all users on each licensed computer. The software may not legally be used on any other computers. Copying for use on other computers is prohibited.

Example: Western University wants to install *IPANow!* on the 24 computers in their computer lab. They will pay \$19.99 X 24 licenses for a total of \$479.76.

All prices are in US\$ and are subject to change without notice.
